PROFILE

A diligent, disciplined, and honest professional with experience in web development and IT support. Accustomed to working under pressure, detail-oriented, target-driven, and able to adapt quickly to new environments and tasks. Possesses strong communication skills and works well both independently and in a team.

PROJECT EXPERIENCE

Campus Website & LMS System — Matla Academy

February 2026 – August 2026

- Built and managed the campus website to support academic information and publication needs.
- Developed a Learning Management System (LMS) to support online teaching and learning processes.
- Provided IT support to staff and lecturers on hardware, software, and network issues.

ERP (Enterprise Resource Planning) System Development

Independent Project

- Designed and built a web-based ERP system using CodeIgniter 4, MySQL, and Tailwind CSS to support company operational processes.
- Developed integrated inventory, procurement, and sales modules to streamline business data management.
- Designed the relational database structure and a responsive, user-friendly interface (UI).

EDUCATION

Pelita Bangsa University — Informatics Engineering

2022 – 2026

Minhajul Haq Senior High School — Language Program

2019 – 2022
